EDUCATION

The University of Texas at Dallas
Master of Science in Business Analytics & Artificial Intelligence

Dallas, TX
Jan 2023 – Dec 2024

TECHNICAL SKILLS

Programming: Python, R, Java, HTML, CSS, JavaScript. | **Library:** Django, Flask, Numpy, Pandas, Scikit-learn, TensorFlow. | **Databases:** MySQL, PostgreSQL, MongoDB. | **Tools:** AWS, Tableau, Power BI, Excel (Advanced), MS Office, Alteryx. | **Data Analytics:** Data Cleaning, Data Visualization, Machine Learning Algorithms, Data Science, Statistical Concepts. | **Certifications:** AWS Cloud Practitioner, Google Data Analytics Professional Certificate, Tableau Desktop Specialist.

EXPERIENCE

L&T Technology Services
Senior Engineer

Mysuru, India
Nov 2021 – Nov 2022

- Streamlined CI/CD pipelines in Jenkins using Groovy, reducing pipeline execution time by 30% and streamlining over 150 test cases.
- Automated data collection processes with Python, Pandas, and Excel, cutting manual effort by 50% and ensuring data consistency.
- Performed Software-In-Loop (SIL) Testing, automating over 150 test cases to validate circuit board functionality and improve testing efficiency.
- Analyzed testing data in Excel to identify performance trends, enabling early detection of issues and reducing debugging time by 20%.

Smartried Software Solutions Pvt. Ltd.
Software Developer

Bangalore, India
Apr 2018 – Nov 2021

- Developed a customer support portal that decreased response time by 20% and improved user satisfaction scores.
- Engineered backend RESTful APIs using Python, Django, and Flask, driving a 20% increase in user engagement across applications serving over 10,000 users.
- Enhanced cloud application scalability and integration by implementing distributed computing solutions with AWS, Docker, and Apache Kafka, reducing downtime by 15%.
- Bolstered code reliability by applying unit testing and test-driven development (TDD), decreasing bugs in production by 25%.

ACADEMIC PROJECTS

Telecom Customer Churn Prediction Analysis | *Python, Scikit-learn, XGBoost, Sweetviz, SMOTE*

- Conducted data preprocessing and feature engineering on a dataset of over 7,000 records, leveraging Sweetviz for EDA, reducing analysis time by 40% while identifying churn patterns.
- Built and fine-tuned machine learning models, addressing class imbalance with SMOTE, achieving a 95% test accuracy and an 85% F1-score, improving predictive performance by 20%.
- Investigated customer churn drivers, pinpointing factors contributing to a 30% reduction in retention rates, enabling targeted interventions that improved retention by 15%.

AI Chatbot Development | *Streamlit, Python, Llama 3.2, MySQL Server and Workbench, Flask API*

- Developed an AI chatbot with the LLaMA 3.3 model, featuring a Streamlit-based interface for advanced conversational capabilities and seamless navigation.
- Constructed robust Flask APIs for backend services and integrated SQL Server, boosting data retrieval efficiency by 30%.
- Refined database performance through optimized query execution and schema design in MySQL Workbench, decreasing response times by 25%.
